Percent of people with HIV retained in care

The median number of days to **first dose** of treatment for all adult syphilis cases was **6 days**.

6

Linkage to care within 1 month of a new HIV diagnosis was **79.9%**

There were **1998** syphilis cases treated within **14 days** of specimen collection

Hep C Care

There were **84** people engaged in hep C navigation services

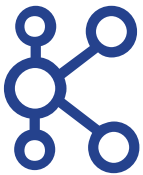

On average, **47%** of people diagnosed with hep C were linked to care

(Among ADHS funded programs)

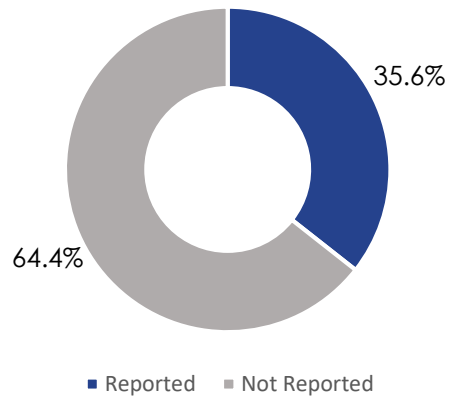

Respond

Outbreak Plan Updates

Hep C: In development
HIV: Active
STI: Active and being updated

During 2023, there were 10 investigated HIV clusters, with only one rising to an escalated status

Percent of HIV molecular labs performed and reported

Surveillance projects initiated and completed by ADHS programs

2021: 9 projects
2022: 15 projects
2023: 16 projects

Arizona Integrated HIV, STI, Hep C Symposium Stats:

2022

Participants: 500
Breakout Sessions: 29
Tracks: 7
Keynotes: 5
*Note this event was held virtually

2023

Participants: 404
Breakout Sessions: 45
Workshop: 8
Tracks: 6
Keynotes: 4
